HIKVISION

HIKVISION

Meet WonderHub Class

Meet WonderHub Class, the **cloud-native teaching platform** for Hikvision WonderHub. Log in from any browser to manage prep, delivery, and follow-up. Let AI handle the background work so teachers regain their time, students find room to create, and together, we reimagine the classroom.

Elevating the Experience for Every Role

For Teachers

Turning manual tasks into **AI-powered teaching.**

For Students

Transforming passive reception into **active engagement.**

For Admins

Streamlining complex operations with **visualized monitoring.**

HIKVISION

AI-Powered Teaching Journey on One Platform

Experience a seamless transition from prep to performance. WonderHub Class leverages integrated AI to simplify **lesson prep**, energize **real-time delivery**, and automate **post-class summaries**. By unifying your entire instructional workflow into one intelligent platform, we empower you to focus on what matters most: inspiring your students.

Before Class

AI Lesson Plan

Generate lesson plans with objectives and activities in seconds.

AI Courseware Generation

Turn lesson ideas into ready-to-teach courseware instantly.

AI Video Generation

Turn text lessons into animated videos with narration.

After Class

AI Teaching Assistant

Answer questions, generate quizzes, and create classroom games.

AI Assignment Generation

Generate multi-format quizzes and exercises in no time.

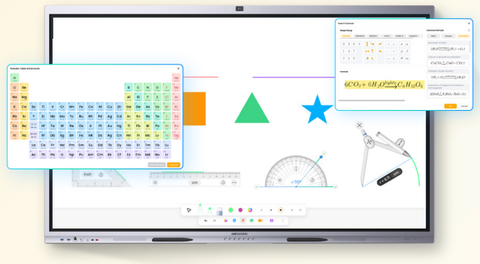

AI-Assisted Grading

Auto-grade questions and generate feedback effortlessly.

Pre Class

Plan with Ease

Dynamic Multimedia Canvas

Elevate your lessons with diverse teaching assets. Insert images, videos, and live webpages, or call up specialized tools — 3D models, the Periodic Table, Science Tools — to make any concept tangible.

Interactive Classroom Activities

Boost engagement with versatile activity modules. Launch Quizzes, Q&A, and Drawing Tasks, or foster collaboration through Brainstorming, Voting, Cloze Tests, and Function Graphing.

Gamified Learning Experiences

Turn lessons into play with high-energy classroom games. Spark friendly competition and boost retention with Sorting, Racing, and Matching Games — designed to make mastering any subject genuinely fun.

Virtual Lab Simulations

Bring abstract theories to life with immersive, hands-on simulations. Create and conduct interactive experiments across Math, Physics, Chemistry, Biology, and Geography, turning every lesson into a virtual discovery lab.

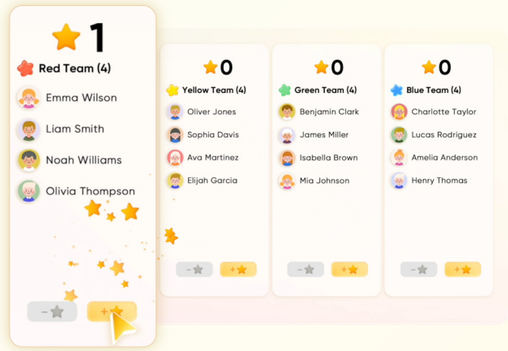

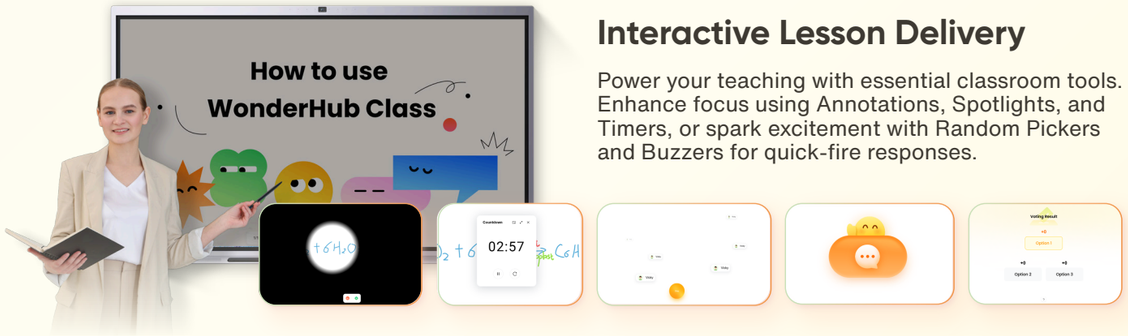

During Class

Engage in Real-Time

Flexible Group Management

Welcome up to 100 students from any device. Effortlessly organize your class into teams and drive participation with real-time group incentives and gamified rewards.

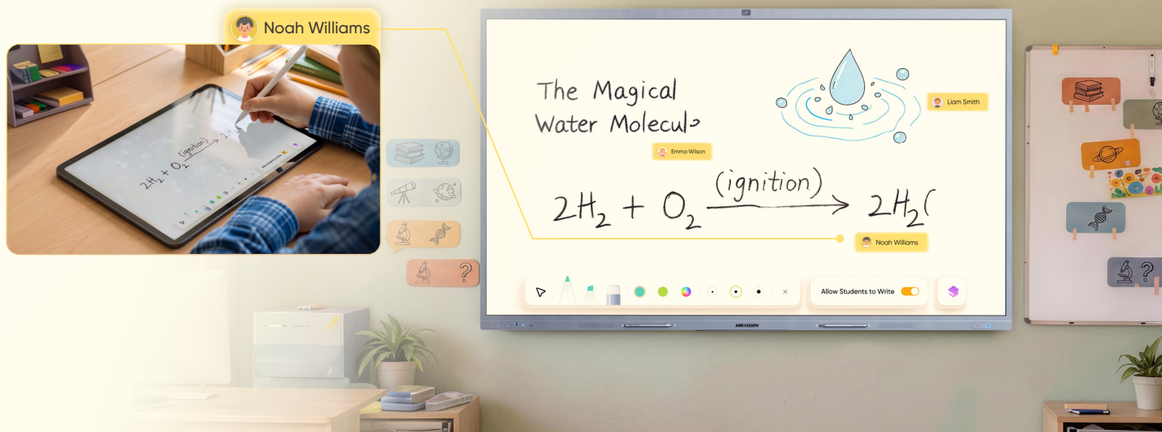

Interactive Lesson Delivery

Power your teaching with essential classroom tools. Enhance focus using Annotations, Spotlights, and Timers, or spark excitement with Random Pickers and Buzzers for quick-fire responses.

Collaborative Whiteboard

Teachers write naturally on the interactive display, while students follow along and co-create in real time on their own screens for a shared learning experience.

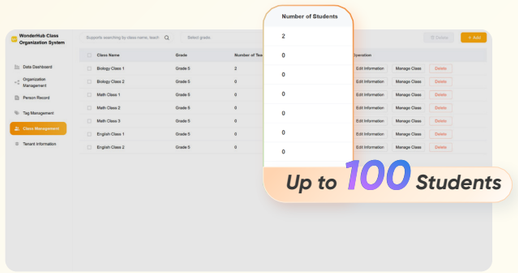

After Class

Review & Grow

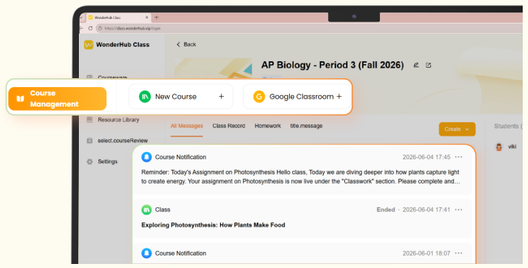

Efficient Class Management

Easily build and manage digital classrooms with up to 100 students. Add learners instantly to your roster and keep your teaching environment organized and class-ready.

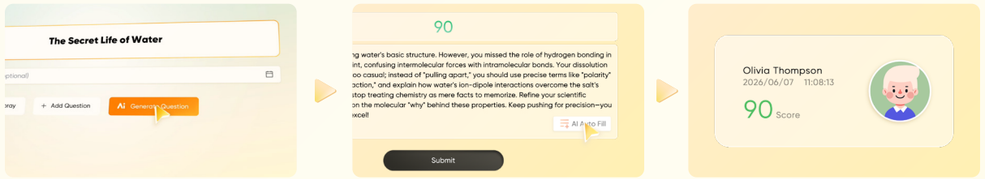

Centralized Course Hub

Create courses manually or sync with Google Classroom. Keep everyone on track by publishing updates, lesson links, and announcements in one place.

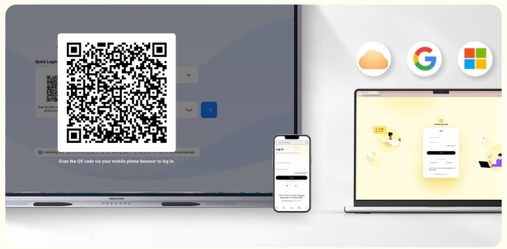

AI-Powered Assignment Suite

Streamline your workload with intelligent homework tools. Create and publish assignments using AI, then save hours with AI-generated answers and personalized feedback tailored to every student's progress.

Effortless Ecosystem Connectivity

Unified Secure Access

Log in instantly with your Google or Microsoft account. Enjoy a secure, single sign-on experience.

Seamless Cloud Sync

Connect Google Drive and OneDrive to WonderHub. Bring your existing documents and media to the IFPD in one click.
